

Stop Madera Ranch Underground Waterbank Project

No Benefit to Madera County!

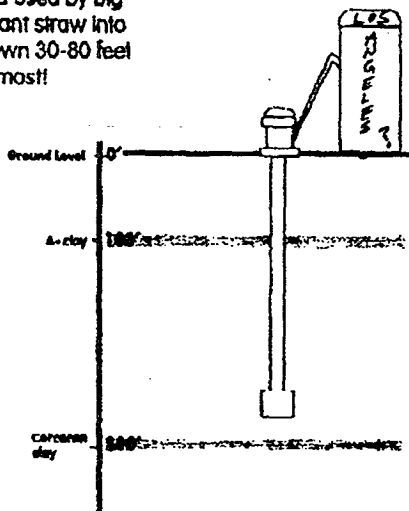

Water put into the Madera Ranch will be taken out and used by big cities such as Los Angeles. The big cities will have a giant straw into our groundwater. Our groundwater levels could go down 30-80 feet more in a drought. Just when we need our water the most!

The "Bank" Doesn't Work!

The hydrologists can't prove the water can seep below the A-Clay layer. Yet they intend to pump out Madera County's water from between 100-300 feet. This isn't a bank, it's a theft!

Selenium Wasteland Arrives!

The soil of Madera Ranch is alkali based. When they float their poor quality Mendota Pool water on the top, the area could become another Kesterson!

Don't Let Madera County Become Another Owens Valley! Voice Your Opposition!

Call your California Senator Maurice Johanson at (916) 322-3960, Governor Pete Wilson at (916) 445-2841 and Secretary of State Bill Jones at 653-7244.
